# HSMA Session 3A: Exercise 3

I will give each peer support group one police force to focus on.

For your region, I want you to
-   Load in a basemap

-   Load in the STATS19 dataset
    (**stats19_collisions_point_data_2022.csv**)
    HINT: If you follow the link above, right click on the page that
    loads (which may be blank!) and choose 'save page as'. It
    should then allow you to download a file in the **csv** format.

-   Filter to to the police force I've given you

-   Create one (or more) layers using point data,
    choosing the field(s) you find interesting

Remember that you can hide certain categories of data, change
icons, add labels, filter…

Agnus	Metropolitan Police
Antic	West Midlands
Arm	West Yorkshire
Denise	Kent
Motorola 68000	Sussex
Paula	Hampshire
Pokey	Thames Valley
Sid	Essex
TIA	Greater Manchester
Zilog z80	Lancashire
